Subject: Donna Eno, CCNA BIO

Donna Eno, CCNA

Engineer, ADR Computer Forensics & ADR Data Recovery

Donna Eno started her computer career when she was in college working in the 'computer lab' to pay for her college tuition. The term 'computer lab' is used loosely here because this was in the days when 64MB of RAM was thought to be huge. The computer was a BASIC4 and the platters were approx. 24" in diameter. Her supervisor had coded a program that contained an error and as Donna was looking over the 11x17 greenbar coded paper, she found the error. Her supervisor was stunned (Donna had no prior programming experience) and the rest is 'history.' Since that time Donna has gained education and experience in computers, telecommunications, networks and databases to include the following engineering certifications: CNA, MCP+, MCNA, MCSE, MCDBA and CCNA. Donna is currently working towards her certification in Forensic Acquisition and Analysis and has held Top Level Security Clearance with the US Government. Donna has also worked with top engineers in her field with such organizations as HP, FEMA, Micron Tech. Inc. and Microsoft in production, research and development. Currently working with ADR Data Recovery as a Database Engineer she manually rebuilds corrupt databases and has the ability to count from 0 to 256 in binary using only four fingers.
